

## OUTDOOR INSTRUMENTS

Technical aids that make the outdoor life more enjoyable. The Multi-Navigator is your guiding star in bad weather or in unknown environments; it is a favourite of many adventurers.

The small, compact, ADC units, with a number of important functions, keep track of altitude, wind chill factor, humidity and other

information that can help you on your journey. They can even wake you from a deep sleep if you wish. Some models save information that you can then transfer to a computer.

The solar cells in the compact Solar I and II panels will provide you with power as long as the sun rises in the mornings. Charge your batteries, the Multi-Navigator, hunting

radio or palmtop computer.

With a map measurer dreams become reality. Daily stages should be linked together and the number of days should be equivalent to the distance you want to cover. A well-planned journey begins in the comfort of your own home and leaves you time to enjoy the trip once you are actually out in the wilderness.

## ADC - ATMOSPHERIC DATA CENTER

### ADC Wind

Wind gauge with clever functions for outdoor enthusiasts. It warns of extreme wind chill, saves information about max and average wind speed and also works as an alarm clock and stopwatch.

Art.no. 55250

- Wind gauge, max and average wind speed
- Thermometer, Celsius or Fahrenheit
- Clock with alarm
- Stopwatch, with split times and countdown timer

### ADC Summit

Functional wind gauge and altimeter with functions that will appeal to skiers, mountaineers and hill walkers. Collected data can be transferred to a PC using ADC IR (accessory).

Art.no. 55251

- Wind gauge, max and average wind speed
- Thermometer, Celsius or Fahrenheit
- Altimeter, precise to 1 metre
- Barometer, with 24 hours' history
- Clock with alarm
- Stopwatch, with split times and countdown timer

### ADC Pro

A wind gauge that also keeps an eye on altitude, weather and humidity. Not only for outdoor enthusiasts, it is also suitable for engineers, painters and others who can use its functions. Collected data can be transferred to a PC using ADC IR (accessory).

Art.no. 55252

- Wind gauge, max and average wind speed
- Thermometer, Celsius or Fahrenheit
- Altimeter, precise to 1 metre
- Barometer, with 24 hours' history
- Clock with alarm
- Stopwatch, with split times and countdown timer
- Humidity meter, dew point, heat index

### ADC IR

Software and communication unit that makes it possible to transfer data from the ADC Summit and ADC Pro. Uploaded data is shown graphically, but can also be exported to a text file. USB connection and software compatible with the Windows operating system.

Art.no. 55253

### ADC Ridge

Handheld altimeter that measures absolute barometer pressure and shows height above sea level. Simple to calibrate for precise altitude readings.

Art.no. 55257

- Barometer
- Altimeter
